"SPEED THE PLOW."

Knew Value of Publicity.

A hen is not supposed to have
Much common sense or tast,
Yet every time she lays an egg
She cackles forth the fact.
A rooster hasn't got a lot
Of intellect to show,
But none the less most roosters have
Enough good sense to crow.
The mule, the most despised of beasts,
Has a persistent way The mule, the most despised of beasts,
Has a persistent way
Of letting folks know he's around
By his insistent bray.
The busy little bees they buzz,
Bulls bellow and cows moo.
The watchdogs bark, the ganders quack,
And doves and pigeons coo.
The peacock spreads his tail and squawks,
Pigs squeal and robins sing,
And even serpents know enough
To hiss before they sting.
But man, the greatest masterpiece
That nature could devise,
Will often stop and hesitate
Before he'll advertise.

Maine Orchard Exhibit, In Memory of Alice E. Maxim, By Mrs. Abble (Merrill) Maxim, Grandin, Fla. formerly of Paris.]

Maine orchards and apples will be the predominating feature of the State deartment of agriculture's exhibit at the Castern States Exposition at Springfield, Mass., in September. The space allotted to Maine this year is slightly larger than last year and the plans for this year's display hold out promise of especial attract-

A section 48 feet in length will be used for the orchard exhibit. Four large flats will be filled with the best of apples that the State produces and there will be three ntervening spaces which will be utilized for miniature orchard demonstration work. These will be planted with real little orchards, each containing a dozen tiny trees. The first one will show a oruning outfit and a dusting machine i peration; the second will have a tracto and a harrow at work, and the third will be devoted to grading operations with grading trays, boxes and barrels. Small electric motors will run this miniature machinery. Pictures of orchards taken from all parts of the State will form backgrounds for-these stalls. In the center wall space above these in

eresting displays will be a clock with a dial five feet in diameter. The figures

"Beckoning hands" bore her away
To that beautiful home,
Where for many a weary day
Her soul had longed to roam,—
Had longed for flowers sweet,
Where sun can never set,—
Beautiful paths for her feat
And friends who ne'er forget;

When the soul is free to soar Unchecked by cares of earth;
All pain and sickness o'er,
In home of peace and worth.
Oh, flowers! Her flowers!
Everywhere they grew,—
Children, from woodland bowers
Brought them—not a few.

Yet in thinking of the past,—
Her charming home and flowers,—
We grieve not she has gone at last
To a home of sunny bowers;
Where light of Jesus' smile,
And touch of his dear hand,
Can from Earth's friends begulle
As she joined the saintly band. The Republican Campaign is Opene

Each like had every voter may be proud to support. In his rapid-fire manner which he adopts when fully aroused, Mr. White then devoted himself for some time to answering the allegation which has gained more or less popularity, that this s a do-nothing congress. This congress, be it remembered, said Mr. White, has been at work only about sixteen months. At the outset it faced the problem of readjusting the whole machinery of the national government. It found the inthe railroads almost in a state of collapse,

the country threatened with an overwhelming pauper immigration from warcrushed Europe, agriculture in a state of profound depression, even the country chnically still at war. To most these conditions Mr. White not only instanced the large number of acts which this "do-nothing" congress has enacted, but gave an analysis of the

various measures designed to relieve the existing conditions. It promptly passed a declaration of peace, and treaties were ber is alive and pushing to put Locke's concluded with the nations with which Mills to the head in the county. Lee we had been at war. It cleared up the matter of the leadership this troop is on a steady gain. foreign loans, left wholly loose by the Boost the Boy Scouts of America—you preceding administration. It passed several measures designed to relieve the agricultural situation, and which have been effective in their purpose. It has reorganized the departments at Wash ington, and separated about 320,000 from the national payroll. It has reduced

estimates and expenditures of the government by billions of dollars, and has adopted a budget system for the governduction of the government expense.

Mr. White concluded his remarks with arence, by which he declared Presider Harding had done more in three months toward advancing a permanent state of peace than any tribunal that had ever existed in the history of the world. This concluded the forengon session. In the afternoon a business session of the

Gov. Baxter, with whom has been to the Danvers, Mass., state hospital left the allotment of Maine's share for the treatment of mental diseases, of world war trophies, has placed according to Supt. John B. MacDontheir disposition in the hands of the ald, in his annual report submitted adjutant-general with instructions to to Gov. Cox and the executive connnotify municipal authorities that they cil. The incident approaches closely can secure these trophies by pay- that of pre-prohibition times, Macing transportation charges. Allot- Donald says in his report, and of the ment of the larger pieces to Maine is as follows: Three 75mm guns and classified under the alcoholic psymowitzers, three 150mm guns and choses. First admissions of alcoholhowitzers, one 210mm gun, three ics comprised 8.6 per cent. of the 76mm trench mortars with vehicles total first admissions, as against 4.7 accompanying same, one 170mm trench mortar with vehicle accompanying same, one 245mm trench mortar with vehicle accompanying same.

other forms of prohibitory legislation, announces a petition will be filed at the State House, Boston, invoking the referendum on the so-called state Volsetad act, which was passed by both branches of the Legislature and signed by Gov. Cox during the last the results of a clean-up campaign session. The league has practically among New England cities awarded obtained the 15,000 signature needed the silver cup representing first prize to stay the operation of the law until to the city of Lynn. Burlington, Vt. it has been passed on by the voters. received honorable mention.

Secret of Terror. A physician tells the New York limes a story to illustrate the fear of tisease. A great novelist once went to consult a famous heart specialist about a pain which was causing him an Knows," says that "It's a sort of rrave anxiety. Before he came the bloom on a woman. If you have it spector took occasion to read one of his you don't need to have anything else; stories which dealt with terror of & 1 245 trench mortar with vehicles child in the dark night. The doctor matter what else you have." That exasked the novelist this question: "Why There is also at the disposal of the did you omit to describe what it was state of Maine a large number of rifles, machine guns, bayonets, and other small that is my craft. The child did not that is my craft.

Scientists say that this old world of ours hasn't varied more than a sec ond or two since recorded in making its annual trip around the sun. Con carried along, the record is remark

### BOSTON MARKET REVEN

For Week Ending July 14, 1922. Prepared by U. S. Bureau of Markets and

BRIGHTON LEVE STOCK AND DRESSED MEAT MARKET. Light receipts and strong Western prices made local offerings firm on most all classes of live stock. Good and medium steers and oxen \$6.50-9.00. Butcher cattle, cows and helfers \$5.00-5.50 few \$7.00. Bulls \$4.50-5.50, canner cows and helfers steady at \$2.50-2.85. Receipts of calves light and market weak on thin kinds, with light and medium lots going at \$2.00-9.00, and a few choice at \$11.00. Under light supply, hogs were firm, bulk going at \$11.25-11.75 per 100 lbs. Fresh meat trad-

Butter market has been rather unsettled changed from a week ago. Speculative Edmund T. Walsh, who died July 4 demand has not been heavy, but some betoraged hands going into and who lived alone in two small storage. Quality has not been up to the rooms at 18 Gates street, South Bos- usual standard and practically are ter arriving show effects of the ton, left an estate estimated to be worth nearly \$50,000. For years he seldom left his rooms except to go to Boston for his meals.

Julian Codman, Henry C. Merwin and Frank J. Sullivan, dog officers and constables, appointed to collect and dispose of uplicensed dogs, destated the arriving show effects of the hot weather. Comsumptive demand continues good and buyers for this trade have kept the market fairly clean of fancy butter. Supplies have been liberal on all grades but on account of the hot weather. Here and There.

Some people think the United State is going to the dogs; others that it wil be preserved. The latter class is what one would call optimistic—some people think the members visionary; but they have one good reason, at least, for their belief. If salt preserves, then the United States will be preserved because she pos- at the Hubbard House. sesses the biggest salt bed in the world. Quite a portion of the western country rests on a stratum of salt. If a man dies out in this western country, he may not live again, but he can become a mummy at short notice, by just staying on top night, which, but for the timely assist-the ground instead of allowing his ance of friends, might have been a serisalt has something to do with it. Any way, if the devil hates salt, it is a good quickly sank, but Leon Poland and Kenplace to die in. One would naturally neth Benson seeing his plight swam out rather dry up with salt than burn up to him and brought him to shore after with brimstone. No one knows just quite a struggle. Beckler was nearly exhausted for a short time. Mrs. Ed Foster and how big this bed of sat is, but by bor hausted on reaching the shore, but soon here for a short time. ings it has been found in Kansas, Okla- revived, although he was unable to work homa, Texas, New Mexico, and of course miles. By borings its thickness has been Mechanic Falls and Paris Hill Sunday. found to vary from 150 to 700 feet. Its G. W. Q. Perham and family were area, so far as ascertained, is, at least, 100,000 square miles. These borings were not made to discover salt, but oil, were boring for riches, and they found them—that is, if they utilize this vast amount of salt. Averaging up the thickness, there must be 30,000,000,000,000,000 (of one can enumerate these figures) tons of the stuff. It is supposed to have been deposited by the drying up of a vast shallow sea away back in the dim and misty years of the past.

The people of Dover, this state, have faith that the town was floating on lake of oil. For about a year they have was located. They are down 1800 feet and have not struck "ile" yet, but have found other things and their courage is yet good. Several gas pockets have been down, and the drill has penetrated three seams of coal. One of these seams i nine feet in thickness, another seven while the third is very thin. Some o this coal has been tried—it burned all right. It is bituminous in quality, and is thought to be of the same series of veins which extend from Nova Scotia to

"Australia is the producer of a mos beautiful variety of opal-a white opa and found nowhere else in any quantity. They are finding a difficulty in selling them on account of the superstition that an opal is an unlucky stone; so they are selling them under the name of "iridots," a Greek name for rainbow. At Marlborough Street police court a nember of a street band charged with obstruction was said to be making more than £7 (\$35) a week. From a Musicians' union comes the comment that this is no uncommon sum; and that street musicians have been known Cyrus, Harry, Perien and John. Funeral to refuse places in a theater orchestra. As they would earn there from £3

Money In Street Music.

Gorgeous Turkish Wedding. A Creosus-like wedding on which 350,000 was spent was celebrated in Stambul recently, despite the general poverty of the present-day Turks. The bridegroom, an Albanian Turk, made a, big fortune after the armistice by

selling offal. He hired 48 houses for the wedding guests, who were entertained sumptuously for a week. A hundred motorcars and 300 open carriages followed the bride's closed and ortained carriage to a large school building, which he had rented and decorated for extravagant festivities. Each table provided for 800 guests and was loaded with Turkish delicacies. The wedding presents, it is said, were worth \$30,000.

Illustrating Food Values. To teach food values to children and to combat malnutrition the American Museum of Natural History circulates a traveling exhibit which includes a set of 16 wax models of food suitable for children between the ages of ten and thirteen and models and charts illustrating the composition of six common foods and the contributions of different foods to the

New Shantung Coal Field. A newly discovered coal field is re ported in Shantung province, which i said to contain an immense quantity o smokeless coal, according to the Com pressed Air magazine. Chinese and foreign engineers are engaged in the exploration of the coal field, and the mine is to be developed under Chinese auspices at an expenditure of \$500.000. NOTICE.

STATE OF MAINE.

Billings Block

To the Honorable Justices of the Supreme Judicial Court to be held at Paris, within and for said County of Oxford, on the second Tuesday, of October, A. D. 1922. Respectfully represents, John Paakkonen, resident at Woodstock, in the Ccunty of Oxford and State of Maine, that he was lawfully married to Lydia Paakkonen, now of parts unknown, at Paris, in the County of Oxford and State of Maine, on the second day of April, A. D. 1910, by C. Howard Lane, duly authorized to colemnize marriages therein: forth; That the Libellant has resided in this State in That the Libellant has resided in this State in good faith for one year prior to the commencement of these proceedings;
That the Libellant has ever been faithful to his marriage obligations, but that the said Libellee has been unmindful of the same;
That there is no collusion between your Libellant and the said Libellee to obtain a divorce; and abusive treatment toward your said Libellant to the great injury to his health and happiness.

That one child has been born to them during their said marriage, and is now living, viz.: Harold Paakkonen, age six years.

Wherefore, your Libellant prays that a divorce from the bonds of matrimony between himself and the said Libellee may be decreed, and that the care and custody of their minor child, Harold Paakkonen, may be given to said Libellart. And your Libellant further alleges that the residence of said Libellee is unknown to your Libellant and cannot be ascertained by reasonable diligence. ble diligence. The best way to protect fors during

he months when they are not in use is

sh the natural skins, but it is an inter-

esting fact that they have a tendency to

shun for which has been dyed. This is be

cause the aniline dye which has been used

a powerfully antiseptic and has insect

icidal properties as well. Incidentally, it is never wise to sprinkle any so-called moth killer or repellent on a fur coat which has been dyed, as a chemical ac-

tion is liable to result with the aniling dye in the skin.

For the same reason, also, you should

never put camphor, napthalene, or even tarred paper with dyed Persian rugs. A

valuable Persian or Arabian rug should

be rolled up with paper on top and

bottom and the ends wrapped so that

moths will not have access to them. The wools in the foreign rugs have not been

treated as have been our domestic rugs, and hence are more attractive to moths. They are taken care of abroad by brush-

In packing away silks, wrap them up

separately in paper and tie them securely. Never use anything on them,

such as camphor and napthalene, which might leave a grease spot.

Many people have the erroneous idea

that the campain against moths need be carried on only in warm weather. Al-

hough one may not see quite so many

adult moths flying about in the winter

months, the larvæ are quite as destruct ive as they are in warm weather. The mother which is seen flying about with

the first signs of spring must have been

in the larva stage during the winter. It neans, therefore, an all-year round strug-

How to Make Popovers.

A happy change from the muffine an

biscuits so generally served is found in a

plate of hot popovers. Strangely, though

popovers to many a wife bespeak an .un

known realm, something still to be con-quered. And yet temperature solves it

Popovers in the making call for milk, flour, eggs, and salt. Milk is eighty-seven per cent water, and when a high

heat is suddenly applied to the popover

batter, the water rapidly changes to steam, expands to many times its vol-

ume, stretches the gluten walls of the flour to their utmost, and with the help of the egg forms the hollow shell. On

the other hand, if a low heat is applied.

he change from water to steam is slow

in. Place the desired number of gem-pans in the oven and allow them to heat.

ternately to the beaten egg, using the egg-beater for mixing it. One teaspoonful of melted butter may also be added

The miller moth or adult moth which you see flying about is served as a dessert with a filling, or a in itself a harmless creature. Her life is very short, and her only function is to breed. She usually deposits her eggs on one of two ways: Drop a piece of apple, some animal fiber and as for an week pressed as a dessert with a filling, or a pleasing addition and may be added in one of two ways: Drop a piece of apple, some animal fiber and her first an week or the peach or the provider into the better in some animal fiber such as fur or wool, peach, or other fruit into the batter so as to provide food for the larvæ when each cup before baking, and bake the they hatch out. This is not always true, popovers in the usual manner. Or bake however, as she does not nest her eggs, but is quite apt to drop them anywhere, apparently forgetting about them. After several weeks the egg hatches into the worm or larva, at first having the apparently forgetting about them. After as soon as they are removed from the oven, and insert a few spoonfuls of any worm or larva, at first having the apparent of a tiny white caterality and several the data mainter. Or bake however, as she does not nest her eggs, the popular as directed above, then out a slit in the side of the popular as soon as they are removed from the sauce, preserve, jelly, or canned fruit. pearance of a tiny white caterpillar, and it is this little pest that does the damage. It begins to feed immediately, preferring as its diet such materials as fur, wool, and silk, or combinations of these with other materials, and you will note that

#### PREVENTION IS BEST METHOD Wise Old Persian Had Right Idea Concerning Disease, Long Before

Birth of Christ.

Five hundred years before the birth of Christ a wise old Persian father poisonous gas, one that is heavier than air, administered over a long period of time is the most effective killer of the egg and larva. This, however, is not practical as a household method, but the advised his son, Cyrus the Great, that the thing to do is to have physicians prevent disease; in modern language, keep two jumps ahead. So the idea that there should be all-time health officers to prevent disease is not a thing to be looked on as an in More than twenty-five centuries ago

conversation like the following took

place between Cyrus and his father:

"I have heard and seen that those states which seek for good health educate their physicians, and that commanders take with them phy sicians for the sake of the soldiers,' said Cyrus. "I, too, therefore, as soon as my present expeditions were intrusted to me gave my attention to the subject and thought that I had

### HONOR GOES TO VERMONTER

sickness at all."

Thaddeus Fairbanks of that State Made First Weighing Machine in the Year 1831.

The origin of weighing things dates spots. The heat of the iron and steam will kill any eggs which happen to be present. For storing the clothes, tarred present. For storing the clothes, tarred ceased to depend upon his own efforts for his livelihood and began trading with his fellows he was confronte with the need of weighing things in order to determine the actual weight of whatever he traded in. The trade of the world developed b

erously.

Cedar chests make excellent storage places. Repellents such as napthalene balls, camphor, etc., which are distasteful to the moth, but will not kill it, are leaps and bounds over hundreds years, but we did not have scales until about 1831, when Thaddeus Fairbanks of Vermont made and patented the first one. Before that time weighing of heavy loads was done by a crude method. When weighing a load of hay the wagon with the hay was suspended on a huge steelyard, originally fashioned during the days of ancient Rome. Fairbanks' first scale was it its essential principles the same are the scales of today, and its suc cess quickly spread over the world. Orders poured in from every direction for his scales were not only more convenient than the old method of hoist steelyard but they were also more accurate. With the steelyard, the actual weight might be ascertained within fifty pounds, whereas today, on scales capable of weighing 300,000 pounds,

> the smallest fraction of an ounce. Sustaining the Interest. "There are many investigation which reveal no new conclusions?" #### First-in Boston

In Boston, at the busy corner of Boylston and Tremont Streets, 561 motorists, chauffeurs and motor truck drivers were asked a few weeks ago which brand of gasoline they preferred. Accord, ing to the sworn report, So. cony was the first choice by a wide margin over the second on the list, and had three times as many users as the third. And Socony has been found to be the most popular gasoline generally throughout New York and New England.

# The majority prefer Socony Gasoline

NOTE—"Boiling-point" is a common term in the gasoline testing laboratory. Most liquids boil (vaporize) at one uniform temperature. In the case of water this temperature, or boiling-point, is 212° F. However, every gasoline has many boiling points—a whole series or range of them in fact. It is this range of boiling points AND the proportion of each group of them (low, medium and high) that really determine the quality of a gasoline—its volatility, power and mileage-

AND chiefly because Socony, with the proper range of boiling points, is the most dependable—in big cars and small ones, in motor trucks and taxicabs, in twelve-cylinder motors and four-cylinder ones, in 'buses and in motorcycles,

The marked preference everywhere for Socony among gasoline users certainly indicates one thing very strongly—that Socony is first of all a thoroughly dependable gas. Hundreds of thousands of motorists would not use it just because it had a little extra power if it were slow-starting. Nor would they use it month in and month out because it gave a little more mileage if it caused trouble because of carbon or sediment.

The fact is that Socony gives you the most consistent power and mileage. Socony has always been noted for its cleanness, for its easy starting and its uniformly high quality. And largely for one reason: it is a carefully balanced gasoline, having the proper range of boiling points in the correct, balanced proportion. (See diagram and Note.)

Use Socony regularly. It is obtainable everywhere and is always dependable.
